(*a*) Population estimates for periods subsequent to the Census of 30th June, 1954 represent the population ascertained at the Census plus natural increase and recorded net migration since that date. As records of inter-state migration are liable to some margin of error, estimates of population so derived are subject to revision when actual population figures are ascertained at the next Census.

(*b*) Annual average 5 years.

NOTE.—Minus sign (—) denotes decrease

NOTE.—The above figures show the loss or gain by migration. Minus sign (—) indicates loss by migration.

(*a*) Troop movements have been excluded for the period September, 1939 to June, 1947.
(*b*) Owing to the difficulty of separating troop movements, records of interstate movements have been excluded from July, 1943 to June, 1947. The figures in respect of this period refer to overseas migration only.
(*c*) Including intercensal adjustment of population believed to represent unrecorded migration.
(*d*) Subject to revision. (See note (*a*), page 3).

(*a*) Deaths occurring at sea, or on foreign ships in Tasmanian waters, which were registered in Tasmania, are not included.
(*b*) Croup has been included with diphtheria since 1913.
(*c*) Includes arteriosclerosis in association with cerebro-vascular lesion. Includes cerebral apoplexy in all years except 1940.
(*d*) These results are the arithmetic mean of the rates for each of the five years.

SCOPE AND DEFINITIONS

Scope: The statistics included in this volume relate to goods imported and exported by sea and air as part of Tasmania's trade with other Australian States and oversea countries.

Source of Data: Statistics of oversea trade are based on documents required by the Department of Customs and Excise under the Customs Act. Statistics of Interstate trade by sea are compiled from trade warrants required under the authority of the Marine Act, 1921. Statistics of Interstate trade by air are compiled from returns furnished direct to the Tasmanian Office of the Commonwealth Bureau of Census and Statistics by all those who use this medium for the transportation of goods.

Country of Origin and Destination: The countries shown are those from and to which *direct* shipments are made. Goods shown as imported from the other Australian States include those goods imported from oversea and transhipped to Tasmania; and similarly exports to other Australian States include goods exported for transhipment oversea.

Values: All values in this bulletin are expressed in terms of £ Australian. Basis of value for oversea imports is "transaction value, actual (f.o.b.)" or "domestic value (f.o.b.)" if higher. Oversea exports are valued at transaction value except goods sold on consignment. Interstate imports and exports are valued f.o.b. at port of shipment.

Quantities: Where quantities are shown, they are expressed, as far as possible, in terms of normal trade units. Quantities are not quoted in respect of those commodities for which there is no appropriate unit of quantity, e.g., Clothing, Fancy Goods, &c.

General: For some individual articles of interstate imports, the quantities and values set opposite them are not complete, because the absence of itemised details necessitates their inclusion under general headings, e.g., some tea, coffee and other packaged goods would be included under "Groceries (Unspecified)"; similarly individual items of apparel and attire would be included under "Drapery (Unspecified)".

Classification of Imports and Exports: The tables of imports and exports in this Bulletin have been compiled according to a statistical classification divided into 21 classes, which came into operation on 1st July, 1945.

(a) The figures given for each port do *not* take into account coastal movements of shipping. Ships are recorded as arrivals at the *first* Tasmanian port of call only, and as departures only at the last port of call in Tasmania. A vessel coming direct to Stanley from Melbourne, calling at Burnie, Ulverstone, Devonport and Launceston and leaving the latter port for Sydney, would be recorded only as an arrival at Stanley and a departure from Launceston. For total shipping (including coastwise) at each port see page 32.

(*a*) Average annual yields are based on the number of dairy cows which were in milk at any part of the year. Averages are, therefore, lower than for cows which were yielding during the greater part of the year. The figures given should be treated as an index rather than an actual average quantity of milk produced per dairy cow.
(*b*) At 31st December.

SUMMARY OF METEOROLOGICAL CONDITIONS, TASMANIA, 1958.

The year opened with dry conditions throughout the State though some relief was brought by rains on 18–19th February. General dryness continued into March but timely falls at the end of the month were of great benefit to the apple crop. By April, the dry summer—autumn period was being compared with the 1914 drought in the North-west. However, May was very wet and all drought fears were quickly dispelled. Monthly totals were records at many Stations. Comparatively dry and settled weather followed until August when drenching rains again established records, especially over the East Coast. After the most summer-like November for years, December yielded above average rainfall generally.

The only hot spell of the summer was on the 25th-26th February. After a fairly normal March, April days were warm, 3 days over 80° being recorded in Hobart. There were heavy frosts in the last week. The mildest spell of the winter occurred during the first four days of June when many Stations recorded temperatures in the sixties. A reading of 68.2 in Hobart was the highest in June since 1907. Spring weather was changeable; a cold October was sandwiched between two pleasant months. November produced long periods of settled and sunny weather. In December, the only days on which 80°F. was reached were the 8th and 9th; it was a cool month.

May, August and October were noteworthy months of flooding. The Pieman River was most affected in May, the Derwent in August and the South Esk in October. Flooding was the worst in the Derwent since June, 1952 and in the South Esk since May, 1956.

In May, gales were frequent in the last fortnight and the wind travel in Hobart was a record. Several tornadic squalls occurred in the North. Another notable windy period was at the end of March when Hobart registered 79 m.p.h. as a record. Gales also were pronounced in June and August.

The year did not produce exceptional snow falls, though on two occasions (August and October) snow fell in Hobart. Heavy falls developed at the end of August, and again in October during the third week. The most spectacular fall was in mid June when a brief storm deposited snow over all the Eastern Highlands. The low country on the West Coast also was well covered in this storm.

1. MANUFACTURING STATISTICS

(i) SCOPE OF THE STATISTICS

Scope—The statistics are compiled annually and show—

Number and size of factories: Number of persons employed in various categories: Salaries and wages paid: Book value of land, buildings, plant and machinery (not capital invested): cost of material, containers, power, fuel and light (including water and lubricating oil) used in factories: Cost of repairs and replacements to factory buildings and plant: Value of output: Value of production: Quantities and values of fuel used: Quantities and values of principal materials used and articles of output: Value of additions and replacements to, and depreciation allowed on, land, buildings, plant and machinery: Rated horse-power of engines ordinarily in use and those in reserve or idle.

Definition of "Factory"—For the purposes of the accompanying statistics a "factory" is taken to be an industrial establishment in which four or more hands are employed or in which power other than hand is used.

(ii) PERIOD COVERED

The period covered by the statistics in this Bulletin is, in the main, the twelve months ended 30th June. In cases where some other accounting period is used it is permissible for factories to complete the census schedule for that accounting period. These cases, however, are comparatively few and their inclusion in no way impairs the comparability of the statistics in the year under review or from year to year.

(iii) DEFINITIONS OF TERMS USED

Average Number of Persons Employed.—All persons employed in the manufacturing activities of a factory are counted as factory employees. The figures relating to employment, therefore, *exclude* all those engaged in selling and distribution, such as salesmen, travellers, collectors, carters engaged solely on outward delivery of manufactured goods, and retailing storemen. The figures do include, however, proprietors who work in their own businesses, as well as "out-workers".

The average number of persons employed, as outlined above, means in general the average number over the whole year and not the average over the period worked, *i.e.*, where factories work less than a full year, the average number is expressed as the equivalent of employment for the whole year. The classification of factories according to number of hands (Table No. 5) is, however, made in accordance with the numbers employed during the period worked. In all other tables relating to employment, and in the computation of average salaries and wages paid, output per employee, &c., the average number throughout the year is used.

Cost of Materials Used.—This item includes the cost, in the usual sense of the materials used, treated, operated on, or worked up in producing the articles included in output. In general, it does not include the value of customers' articles or materials repaired, assembled, or treated by the factory.

Other Costs of Manufacture.—Includes the cost of power, fuel, light, water and lubricating oils used, costs of repairs and replacements to factory plant and buildings, and cost of containers and wrappers, but excludes depreciation allowance and other unrecorded overhead charges.

Value of Output.—The amounts given under this heading represent the wholesale selling value at the factory, of goods made or processed during the year, including by-products. In addition, it includes the value of other work done, such as repair work, assembling and making up for customers.

Value of Production.—The value of production of any industry was defined by the Conference of Statisticians 1925, as "the value of consumable commodities produced during the year, deducting, so far as possible, the value of goods consumed in process of production."

In accordance with this definition it was agreed that, in the valuation of factory production, deduction should be made from the value of the output of the cost of raw material, containers, power, fuel, light, lubricants, water, tools replaced, repairs to plant, and for depreciation. All these except depreciation are included in the two items "Cost of materials used" and "Other costs of manufacture" as defined above. On account of the difficulty experienced in securing accurate figures for depreciation, it was subsequently agreed that the particulars obtained should be published, but that no deduction should be made on this account for the present. The value of production as given in the following tables is obtained, therefore, by deducting "Cost of materials used" and "Other costs of manufacture", as defined above, from the "Value of output". This method of valuing factory production has been adopted by the Statistical offices throughout Australia.

During 1957–58, the amounts of depreciation allowed were stated to be £762,116 on land and buildings, or 1.28 per cent. of the total book value of freehold land and buildings, and £3,257,238 on plant and machinery, or 6.95 per cent. of the total book value of freehold plant and machinery. Details of depreciation appear in Tables Nos. 19 and 25. There are also many miscellaneous expenses, such as maintenance of buildings, &c., depreciation, workers' compensation insurance, other insurances, pay-roll tax, income tax, advertising, interest on borrowed money, bad debts and many other sundry charges, which are not taken into account. Consequently it must not be inferred that, when wages and salaries are deducted from value of production, the whole of the surplus is available for interest and profits.

Rated Horse-power of Engines Used.—Statistics of power used in factories other than Central Electric Stations relate to the "rated horse-power" of engines ordinarily in use and of engines in reserve or idle omitting obsolete engines. In the case of Central Electric Stations, the figures refer to the "rated capacity" of engines and generators installed.

(*a*) Average *whole* year, including working proprietors. Excludes men engaged in felling, &c., and carting logs to mill.
(*b*) Excludes amounts drawn by working proprietors and amounts paid to workers engaged in felling, &c., and carting logs to mill.
(*c*) Represents principally value of logs sawn, peeled or sliced, but also includes value of minor items such as nails, tie-wire, &c., used.
(*d*) Includes cost of water and lubricating oils used, cost of repairs and replacements, containers and wrappers, but excludes various overhead charges.
(*e*) Value of sawn, peeled and sliced timber produced (shown in last column) plus added value due to re-sawing, and dressing operations and making up into fruit cases, plywood, &c., where this is actually performed in the mills.
(*f*) Value of output less costs of manufacture other than labour.
(*g*) Suburbs comprise Glenorchy municipality and metropolitan portions of Clarence and Kingborough municipalities.
(*h*) Suburbs comprise surburban portions of Beaconsfield, Lilydale, St. Leonards and Westbury municipalities.
(*i*) Excludes surburban portion of this muncipality.
(*j*) The value of all timber produced during 1957/58 (at the rough-sawn stage) is estimated at £4,901,439.

(*a*) Average for *whole* year (see definitions, page 3).
(*b*) Not available on a comparable basis.
(*c*) Commencing with 1945–46 includes chemists, draughtsmen and other laboratory and research staff formerly included with "all other workers".
(*d*) Not comparable with figures for previous years; see note (*c*) above.
(*e*) For detailed list of other recorded charges, see definitions on page 3.
(*f*) Includes working proprietors.
(*g*) Excludes working proprietors and amounts drawn by them.
(*h*) Up to 1944–45 salaries and wages relate respectively to the earnings of those included in the columns headed "Managers, Overseers, &c." and "All Other Workers". For 1945–46 and subsequent years amounts paid to foremen and overseers are included under wages.
(*i*) Value of production less labour costs
(*j*) Revised.

2. BUILDING STATISTICS

(i) BUILDING PERMITS

(*a*) Figures relating to Building Permits include details of:

(i) Permits issued by Local Governmental Authorities for the construction of *private* buildings.
(ii) Contracts let and day labour projects commenced by Governmental Authorities.
(iii) Private buildings reported to have been commenced in those municipalities which do not issue building permits.

(*b*) *Values.*—All values shown exclude the value of the land and represent the estimated value of buildings on completion.

(ii) NEW BUILDING CONSTRUCTION

(*a*) Definitions of Terms Used:

Owner-Builder.—For the purpose of this bulletin, an owner-builder is a person who is actually building his own house or is having his house built under his own direction without the services of a contractor.

Commenced.—A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, classifications made by builders may not be entirely uniform.

Completed.—A building is regarded as having been completed when the contractor has fulfilled the terms of the contract. As with commencements, the classifications made may not be entirely uniform.

Under Construction.—A building remaining uncompleted at the end of a period is regarded as being under construction regardless of whether construction was actively proceeding on that particular date.

Employment.—The figures of employment relate to persons actually working on new buildings on a specified day. They include working principals, employees, men working, as, or for, sub-contractors and men temporarily laid off on account of weather. In addition, they include some employees engaged on alterations, additions, renovations, or repairs to buildings when these jobs are undertaken by a contractor who builds new buildings. Because of frequent movement between jobs and because some persons (e.g. electricians) may work on several jobs which are under construction simultaneously, some duplication may occur. The figures include estimates for persons working on owner-built houses.

Values.—All values shown exclude the value of land and represent the estimated value of buildings on completion.

(*b*) Explanatory Notes:

Details in this bulletin relate to the building operations of private contractors, government authorities and owner-builders.

Figures relate only to the operations of persons who build new buildings. Major new additions to existing buildings are included as new buildings.

Minor alterations, additions, renovations and repairs to buildings are excluded, because of the difficulty in obtaining complete lists of persons who engage in these operations.

Figures for houses exclude converted military huts, flats, and shop dwellings. Some houses built on farms are excluded but these do not affect the figures materially.

2. CONSOLIDATED REVENUE FUND

(1) EFFECT OF ADJUSTMENT TO SPECIAL GRANT (COMMONWEALTH)

The Special Grant recommended by the Commonwealth Grants Commission under Section 96 of the Constitution has, since 1947–48, been in two parts. One part is in the nature of a preliminary grant to meet the estimated financial needs of the State during the current financial year. The other part is an adjustment made after the close of the financial year. The magnitude of the adjustment (which may be *positive* or *negative*) will depend on whether the *preliminary grant* made two years earlier proved greater or less than the amount of financial assistance deemed justified by the Grants Commission. See table below for record of adjustments made since 1947–48 and see the Accumulated Revenue Account on page 3 for the method of financing the current year's negative adjustment.

The Special Grant for 1957–58 was £4,466,000 subject to a negative adjustment of £816,000 assessed on 1955-56 accounts and this deficiency was met by the transfer to Consolidated Revenue of an equal amount from the Accumulated Revenue Account.

(2) GOVERNMENT ACTIVITIES SEPARATED FROM THE CONSOLIDATED REVENUE FUND

(i) *Railways, Shipping and Road Transport Services*

In Tasmania, the railways (in common with certain other public transport utilities) are administered by the Transport Commission and, since 1939–40, only the net trading profits or losses of this authority have been paid to or from the Consolidated Revenue Fund. See page 19 for a summary of Transport Commission transactions. Interest and redemption charges on advances to the authority by the State Government are paid into Consolidated Revenue, as shown on page 14.

(ii) *Hydro-Electric Commission*

Gross receipts and expenditure of this authority are not included in the Consolidated Revenue Fund. Interest and redemption charges on advances to the authority by the State Government are paid into Consolidated Revenue by the Commission. See page 18 for a summary of the Commission's transactions and page 14 for payment of debt charges to Consolidated Revenue.

(iii) *Finance for Roads*

The State's share of Petrol Tax (Commonwealth) is paid into the State Highway Trust Fund which is augmented by transfers from the Consolidated Revenue Fund. For details of the State Highway Trust Fund, see page 20.

(iv) *Miscellaneous Activities and Authorities*

Also excluded from the Consolidated Revenue Fund are the gross receipts and payments of— Metropolitan Transport Trust, (page 19), Government Printing Office, Government Insurance Office, Public Trustee, Housing Authorities (see top table, page 20), Closer Settlement, Rural Credits and other activities of the Agricultural Bank. In accordance with various Acts, the *net* profits or losses of the *previous year* are paid to or from the Consolidated Revenue Fund for the *current year*.

NOTE.—The figures given in the tables relating to public debt and interest represent the " face " or " book " value of the debt without adjustment on account of currency changes since the loans were floated, and the nominal amount of interest payable, taking no account of exchange.

(*a*) Interest has been calculated on the face value of individual loans outstanding at the 30th June. Actual interest paid is shown on page 14.

(*b*) Excludes £400,000 Treasury Bills issued in aid of Revenue.

(*c*) Net aggregate advances from the Commonwealth for Housing under the second Commonwealth State Housing Agreement (£4,048,201 at 30th June, 1958) are not included in the Public Debt, the State being regarded as trustee for the Commonwealth. Similarly excluded is the net aggregate advance of £11,261,000 from the Commonwealth for War Service Land Settlement.

(*a*) Collections at the Central Office (which for the whole of Australia amounted to approximately one-third of the total) are not included. Includes tax on individuals and companies, Social Services Contribution and Wool Deduction.
(*b*) Estimated. The amount of tax collected in other Australian States on goods transhipped to Tasmania is not known. In the period 1901–1909 when Customs and Excise duty on such goods was recorded, the average total yield per head in Tasmania was approximately 80 per cent of the corresponding Australian figure and the estimate, based on this percentage, is probably an understatement.
(*c*) Excluding Central Office collections of Land and Income Tax. It is assumed that Tasmania bears the incidence of Customs, Excise and Sales Tax, collected in the other States, in the form of increased commodity prices.

In the above table the combined Commonwealth and State totals have been adjusted to exclude major duplications, but the separate Commonwealth and State figures are as shown in previous tables in this Appendix.

The items excluded from the adjusted figures are the following—Tax reimbursements, Special Financial Assistance, payments of interest under the Financial Agreement, Special Grants, Coal Strike Emergency Grant and Price Control Reimbursement Grants by the Commonwealth, and State payments of Pay-roll Tax to the Commonwealth. Commonwealth grants to the States for Universities, Mental Institutions Capital Expenditure and Tuberculosis Capital Expenditure and payments from the Commonwealth National Welfare Fund are also excluded where these are received by State Consolidated Revenue Funds. There are other duplications for which allowance has not been made (e.g., various payments from the Commonwealth to the States for services rendered and miscellaneous Commonwealth receipts from the States) and the adjusted figures are therefore still slightly overstated.

(a) The figures are based on the 1954 Census records to which have been added the recorded number of new dwellings completed in each municipality in the four years since the Census. The 1954 Census figure selected as a starting point included houses, flats, hotels, boarding houses, educational, religious and charitable institutions, hospitals, &c.; but not unoccupied dwellings, (weekend and holiday shacks, &c.). Allowance has been made for known losses by fire, demolition and conversion for commercial use.

(b) Includes migratory population (648 persons) not included in any municipality.

(c) Includes 22 miles of concrete road.

(d) Includes 2 miles of concrete road.

(e) Includes 24 miles of concrete road.

(a) State Government valuation. Valuations are not uniform since the State Valuation Branch has not yet completed valuation of all municipalities and the process cannot be performed simultaneously in all municipalities.
(b) Average rate per £1 of Assessed Annual Value. In all municipalities except Hobart and Launceston, individual rates will vary from the average according to location of the property and services rendered.
(c) Includes permanent and temporary employees at 30th June, 1958.

(*a*) All generation and distribution of electricity in Tasmania is undertaken by the State Hydro-Electric Commission.

(*b*) The Metropolitan Transport Trust assumed control of Hobart Tramways on 28/2/55 and Launceston Tramways on 30/6/55. Hobart and Launceston Corporations are still nominally responsible for debts incurred for Tramways prior to these dates but annual interest and redemption charges on the debts are re-imbursed to them by the Metropolitan Transport Trust. The charges have therefore been eliminated from the details shown for the two Corporations and in subsequent debt tables (page 15), Tramways debt is treated as a direct liability of the Metropolitan Transport Trust.

(*a*) Note—There was no debt outside Australia at 30th June, 1958.
(*b*) These advances were mainly made from State Loan Funds and therefore form part of the State Public Debt. "State Government" includes semi-governmental authorities such as the Housing Department which makes advances to Municipalites in the development of housing settlements.
(*c*) Much of the debt of the Local Government Authorites is in the form of Instalment Debentures which involve equated periodic repayments.
(*d*) Mainly periodic payments in reduction of principal; repayments of loans from Sinking Funds is excluded. Repayments excluded are: Hobart £34,940 and Ulverstone £1,100.
(*e*) Only semi-government authorities which have additional loan liabilities to creditors *other* than the State Government are included. This conception excludes authorities like the Transport Commission and Housing Department which have borrowed exclusively from the State Government.
(*f*) Loans for Tramways raised by Hobart and Launceston Corporations before the formation of the Metropolitan Transport Trust are included as direct liabities of the Trust. In previous issues of this publication, they were shown as liabilities of the Corporations and excluded from the debt of the Trust.
(*g*) Advances from Commonwealth Government which are passed through State Trust Funds.

1. EDUCATION

STRUCTURE OF GOVERNMENT EDUCATION SYSTEM IN TASMANIA, 1957.

General.—Education is free, secular and compulsory from the age of six to sixteen years.

Levels of Education.—(1) Sub-Primary; (2) Primary; (3) Secondary.

Sub-Primary.—Pre-Schools (subsidized by State) cater for infants prior to entry to Kindergarten.

Primary.—Primary Schools and Area Schools contain primary departments, comprising six grades (I-VI). Entry is at age six years and the normal age for movement to the secondary level is at age twelve years.

Secondary.—Secondary education is available in:—(1) High and Technical High Schools; (2) Comprehensive High Schools; (3) Secondary grades attached to Primary and Area Schools; (4) Secondary Schools. High School courses can broadly be described as academic in bias while Technical and Secondary School courses tend to have a more direct vocational orientation. Both types of course are featured simultaneously in Comprehensive High Schools.

High School and Technical High School Courses.—Selection for entry is based on general accrediting and an ability test . The course of studies covers a period of five years; at the end of the fourth year, successful students become eligible for the Schools Board Certificate (awarded on the results of internal examination and general accrediting). Matriculation is attempted at the end of the fifth year and is obtained partly on the results of external examination and partly on subjects passed for the Schools Board Certificate in the previous year. Matriculation is necessary for University entrance while the Schools Board Certificate gives entry to Technical Diploma and Certificate Courses available at Senior Technical Colleges.

Secondary School Courses.—The course of studies covers a period of three years (Grade VII-IX). Education is given a vocational bias; e.g. in area schools, subjects associated with primary industries are taught with the aid of experimental plots, workshops and specialist teachers. Pupils are awarded the Modern Schools Certificate at the end of the course on the results of internal examinations and general accrediting.

Note on Area Schools.—Area Schools are being established in rural districts with the object of centralising and intensifying educational facilities and opportunities. This development dependent on the free transport of children from outlying areas has caused the closing of many one-teacher schools and explains the reason for the decrease in number of schools while the school population continues to rise.

FRIENDLY SOCIETIES

1. REPORT OF THE GOVERNMENT STATISTICIAN FOR THE YEAR 1957

Hobart,
11th September, 1958.

Sir,

In accordance with Section 10 of the Friendly Societies Act 1888, I have the honour to make the following report with respect to the year 1957.

(NOTE.—Figures in parentheses refer to the previous year—1956)

Returns and Information

Copies of the printed report and tables for 1956 showing the movement in membership, finance, &c., of the societies, were distributed to all lodges and other interested parties.

The returns relating to the year 1957 were furnished in accordance with the provisions of the Friendly Societies Act.

It should be noted that the statistical tables from pages 6 to 21 inclusive relate to ordinary friendly societies only. Special societies (required to register under the Friendly Societies Act), whilst having objects somewhat similar to ordinary societies are not strictly comparable, and therefore the details for ordinary and special societies are shown in separate sections.

Ordinary Societies

At the end of 1957 there were 13 ordinary friendly societies registered in Tasmania with a total of 130 subordinate lodges of which 116 were for males and 14 for females. "Ordinary" societies are those which provide customary sick and funeral benefits and are subject to actuarial valuation.

Special Societies

In addition to the 13 ordinary friendly societies, there were 7 " special" societies registered under the Friendly Societies Act, at the end of 1957. Special societies have objects somewhat similar to those of friendly societies, but their membership is usually restricted to employees of industrial parent organisations. Funds of special societies are not subject to actuarial valuation.

Membership

The total membership of ordinary societies at the end of 1957 was 9,745 comprised of 9,445 (9,983) in male lodges and 300 (334) in female lodges. It should be noted that male lodges have a small number of female members. The following table shows that membership is continuing the steady decline which has characterised friendly societies since 1930.

Ordinary Societies, Membership Progress

(*a*) Includes Clearances and those Re-instated. (*b*) Includes Clearances, Resignations and Arrears.

Distribution of Members According to Age

It is important to note the continued increase in the average age of members. The continuing decline in membership, particularly in the age groups 16-19 years, and 20-29 years has resulted in a drift into the older age groups as indicated in the following table. The membership included in this table is restricted to members of male lodges (ordinary societies) which form the most important section of total membership.

Sickness and Mortality

A general decrease in the number of cases of sickness in ordinary societies was experienced during 1957. This was distributed as follows: Male lodges, 1885 (1,964) cases, with a total duration of 167,220 (174,437) days or an average period of 88.7 (88.8) days per case; female lodges, 37 (39) cases with a total duration of 3,128 (4,149) days or an average period of 84.5 (106.4) days per case.

Details of sickness and mortality in ordinary societies over the past five years are given in the following table.

Receipts

Net revenue of ordinary societies for 1957 was £74,589 (£77,631), the chief items being members' contributions and levies £34,093 (£39,689); interest, dividends, &c., £27,508 (£26,230) and miscellaneous items £12,988 (£11,712). Details for earlier years will be found on page 8.

Expenditure

Of ordinary societies' net expenditure of £63,182 (£70,367), the greater part was distributed in payment of benefits for members which totalled £40,607 (£44,119). This comprised £13,801 (£14,965) sick pay, £6,165 (£6,630) medical expenses and £20,641 (£22,524) funeral benefits. Of the remaining expenditure £17,046 (£17,557) represented cost of administration and £5,529 (£8,691), miscellaneous payments. A summary for 1957 and earlier years will be found on page 8.

Funds

Accumulated capital of ordinary societies by the end of 1957 amounted to £692,214 (£680,651) and the capital per financial member was £72 15*s.* 0*d.* (£68 3*s.* 7*d.*). The rate of interest earned by the funds was 3.97 (3.74) per cent. Details for this and earlier years are given in the table below and on page 8.
